Examiner's Statement of Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The art of record considered as a whole in part or in combination neither anticipates nor renders obvious, a wrench comprising: a cylindrical main shaft comprised of a first divided body having a working portion and a second divided body having an operating handle extending from a portion of the second divided body, wherein the first and second divided bodies are connected so as to be capable of rotational movement relative to each other; the torsion member having a first end, a second end and a twist portion between the first and second ends, the torsion member being inserted in the first and second divided bodies of the main shaft, and providing an elastic restoring force about the axis of the main shaft upon twisting the twist portion by torsion applied to the second divided body; wherein a first end of the first divided body is fixed to the first end of the torsion member, and a first end of the second divided body is fixed to the second end of the torsion member; a cylindrical member rotatably disposed on the second divided body; and torque display means for displaying the torque produced in accordance with the degree of twist of the torsion member with respect to a reference point, together in combination with the rest of the limitations set forth in the independent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
